SMARTER SECURITY CONTROLS
MICROSOFT OFFICE 365

THE SERVICE

Microsoft Office 365 provides organisations with a suite of cloud-based services. The KA2 Smarter Security Controls provide prescriptive guidance for establishing a secure configuration posture for Microsoft Office 365.

The guidance includes recommendations for Exchange Online, SharePoint Online, OneDrive for Business, Skype/ Teams, Azure Active Directory, and Intune, and helps to ensure services will be configured securely to provide your organisation with key controls for:

- Account/Authentication
- Application Permissions
- Data Management
- Email Security in Exchange Online
- Storage
- Mobile Device Management
- Secure Score

DELIVERABLES

The Service includes the key set of deliverables:

PREVENT: M365 Security Framework
The M365 Security Framework defines the recommended security controls for M365 and the available services therein. The security controls will provide the organisation with risk mitigation to potential threats and exposures that may be encountered.

DETECT: M365 Security Management
The M365 Security Management defines how you identify high-risk and abnormal usage, as well as security incidents.

RESPOND: M365 Security Reporting
The M365 Security Reporting is defined to provide your organisation with comprehensive reports to validate and identify security issues and then respond and improve the security posture as required.

KEY BENEFITS

The M365 Smarter Security Controls delivery will provide a best practice security implementation with actionable insight to the regular management of Microsoft Office 365 within your organisation.

ABOUT KA2

KA2 partners with companies in highly regulated sectors to achieve better business outcomes through security-driven IT transformation. Our bold, holistic approach is guided by our proprietary Smarter Framework and combines technology and industry expertise to help companies transcend siloed thinking and organisational constructs, and chart a transformation course guided by information security and compliance.

We specialise in delivering solutions that accelerate business transformation and provide enhanced user experiences for customers and employees. Our vendor-agnostic and multi-dimensional perspective enables us to realise smarter and sustainable results for our clients, so they can deliver better outcomes and services for their clients and end users.

CASE STUDY

A Global Investment firm required a complete security evaluation of Microsoft Office 365 and compliance with industry-led regulatory requirements.

KA2 undertook a 12-week engagement following an Agile delivery method of 6 x 2-week sprints and provided a complete assessment and delivery of the Security Framework, Management and Operational Reporting solution.

CAN YOUR ORGANISATION AFFORD AN INFORMATION SECURITY BREACH?

Protect your environment from an ever-evolving threat landscape. Get in touch with our experts to discuss how to secure your data from increasingly sophisticated security threats.
