

REDEFINE YOUR WORKSPACE

KA2 SMARTER WORKSPACE

The ongoing pandemic has forced many organisations to redefine the role of the office in creating safe, productive and connected work environments. In a world of social distancing and remote working, companies are looking to reduce their property portfolios, limit physical interactions in the office and reshape workspaces to better suit the future role of the office as a central hub.

Whether you're looking to reduce, reimagine or reshape your current workspace, our experts at KA2 can help. By combining our infrastructure expertise with sustainable technology disposal, we're uniquely placed to help organisations overcome the unprecedented office space challenges arising from the pandemic.

REDEFINE YOUR OFFICE SPACE IN A SMARTER WAY

Whether you're thinking of closing your office or looking to adapt your current space for the COVID-era, KA2 can help ensure you achieve a comfortable and safe working environment with an intelligent technology infrastructure.

As experts in technology infrastructure programme delivery, KA2 can help you design and implement a **KA2 Smarter WorkSpace** programme to safely retain, remove, or repurpose your technology assets. We'll help you understand your current infrastructure, drive value from what's worth retaining and guide the sustainable disposal of unwanted assets.

The **KA2 Smarter WorkSpace Framework** guides you through the decision-making process to create a **Roadmap** for the most cost-effective retention, reuse or removal of your existing technology equipment and services.

Execution of the **KA2 Smarter WorkSpace Roadmap** delivers:

- Network density optimisation and isolation/removal of LAN equipment and WAN nodes
- Wireless capacity optimisation and the relevant relocation/removal of WiFi access points
- Engagement with carrier providers for cessation of redundant services
- Disconnection and secure and sustainable disposal of the identified technical assets to stringent **CSR standards** and meeting **UN Sustainable Development** goals

ABOUT KA2

KA2 partners with companies in highly regulated sectors to achieve better business outcomes through security-driven IT transformation. Our bold, holistic approach is guided by the KA2 Smarter Framework and domain expertise to help companies transcend silo-thinking and charter a transformation course guided by information security and compliance.

We specialise in delivering solutions that accelerate business transformation and provide an enhanced user experience for customers and employees. Our multi-dimensional perspective enables us to realise smarter and sustainable results for our clients, so they can deliver better outcomes and services for their clients and end users.

74%

of financial services organisations have been taking stock of their office requirements in the hope of either using the space differently, or reducing it
